BKG Professional NtripCaster

Datasheet

Application

- Dissimination of GNSS real-time data streams via TCP/IP connections, using the RTCM1 standard Ntrip2
- Applications in real time GNSS data centers or in local environments

Specifications

- Written in C programming language under GNU Public License (GPL)
- Running on LINUX (tested for various distributions, such as SuSE, Debian, Gentoo, Redhat)
- Supporting Ntrip versions 1 and 2
- Easy installation and configuration based on a low number of configuration files
- Tested for more than 100 data streams and more than 2000 simultaneous users
- Optional relay function
- More than 100 operational installations worldwide, such as IGS RTS3
- Latest version (October 2016): 2.0.25
- Distribution of software copy including source code
